

RIDERS

UNITED

HAMBURG

RIDERS

UNITED

HAMBURG

WE DEMAND:

- NO UNDERSTAFFED WAREHOUSES
- CARGO COMPARTMENTS ON THE BIKES
- UNLIMITED CONTRACTS
- SHORTER PROBATION PERIODS

- Together we are stronger. To fight against current and future **unfair working conditions**, we have to organise ourselves
- In **solidarity with the Gorillas Workers Collective in Berlin**, we want to join them in the struggle against the bosses
- We are a collective of riders and members of the FAU and IWW self-organised grassroots unions
- **First meeting will be on August 18, 17:00**, at *Schwarze Katze*, Fettstraße 23. Join this **telegram channel** to get further news: <https://t.me/RidersUnitedHH>
- You will stay anonymous; nobody at management will know you're with us.

In recent years, there has been a global rise of a food delivery industry, often delivered by bike, and **exploitation of the employees** has been following in its wake.

But, there has also been constant resistance to these efforts of increasing profits at the expense of workers' health and well-being. **Strikes, protests, workers councils, trust funds**

for striking riders, international organising and solidarity

- These have been and continue to be tools the workers utilise to stand up for their rights - In Berlin, Davao, Hong Kong, Lithuania, Spain, and many more places.

We are a group of riders and members of the Unions FAU and IWW. Our goal is to **organise delivery workers in Hamburg**, and while we concentrate on the Gorillas workers right now, every rider is invited to join us.

The company's reaction to the strikes and the founding of the the Gorillas Workers Collective in Berlin has shown that it is afraid of collective action, and it is clear they're trying to find ways to mute us. They're putting riders under stress tests, Project Ace is being implemented right now, and recently, there have been talks of DoorDash, another huge delivery company from the United States, buying Gorillas.

It is unclear where all these developments will lead for the workers on the ground. But we want to **be prepared**.

Get organised now, to push for our demands to be fulfilled, and to **build resilience against future violations of workers' rights!**

Check out the website for more info, links, coordination efforts, etc.
